This is not for "lean back" consumers of news though stories will be on offer. Meanwhile you can "lean forward" and check other sources with this timescale as a prompt. Since an OhmyNews conference on citizen journalism I have written several stories about UK trade shows. This is written just after the Adobe webcast for financial analysts and ahead of the drupa print event in Dusseldorf. Dates cover the period till Learning Technology early in 2009. So if the websites and/or blogs are not updated as quickly as they should be, do some searching yourself and treat this as a guide. Some of my writing may be fiction.
